Healthy ageing and caring Being able to stay healthy in later life is a crucial issue for all of us. We know that older people often do not feel supported to look after their own health, particularly people with multiple long term conditions, including frailty. This has a detrimental impact on their quality of life and health outcomes.

NHS England » Healthy ageing and caring

Healthy Ageing replaces the World Health Organization's previous Active ageing: a policy framework developed in 2002. Healthy Ageing , like Active Ageing, emphasizes the need for action across multiple sectors and enabling older people to remain a resource to their families, communities and economies.

WHO | What is Healthy Ageing? - World Health Organization

Comprehensive public health action on population ageing is urgently needed. A longer life brings with it opportunities, not only for older people and their families, but also for societies as a whole. Additional years provide the chance to pursue new activities such as further education, a new career or pursuing a long neglected passion. Older people also contribute in many ways to their ...

WHO | World report on ageing and health 2015

At some point in life, often in the 30's, the tell-tale signs of aging begin to be apparent. They can be seen in everything from our vital signs (like blood pressure) to our skin, to our bone and joints, to our cardiovascular, digestive, and nervous systems, and beyond. Some aging changes begin early in life.
