Pulitzer Prize-winning critic Ada Louise Huxtable's biography of America's greatest architect Renowned architecture critic Ada Louise Huxtable's biography Frank Lloyd Wright looks at the architect and the man, from his tumultuous personal life to his long career as a master builder. Along the way she introduces Wright's masterpieces, from the tranquil Fallingwater to Taliesin, rebuilt after tragedy and murder-not only exploring the mind of the man who drew the blueprints but also delving into the very heart of the medium, which he changed forever.

Frank Lloyd Wright has long been known as a rank egotist who held in contempt almost everything aside from his own genius. Harder to detect, but no less real, is a Wright who fully understood, and suffered from, the choices he made. This is the Wright whom Paul Hendrickson reveals in this masterful biography: the Wright who was haunted by his father, about whom he told the greatest lie of his life. And this, we see, is the Wright of many other neglected aspects of his story: his close, and perhaps romantic, relationship with friend and early mentor Cecil Corwin; the eerie, unmistakable role of fires in his life; the connection between the 1921 Black Wall Street massacre in Tulsa, Oklahoma, and the murder of his mistress, her two children, and four others at his beloved Wisconsin home. In showing us Wright's facades along with their cracks, Hendrickson helps us form a fresh, deep, and more human understanding of the man. With prodigious research, unique vision, and his ability to make sense of a life in ways at once unexpected, poetic, and undeniably brilliant, he has given us the defining book on Wright.

Originally published: New York: Duell, Sloan and Pearce, 1943.

Born in Wisconsin in 1867, Frank Lloyd Wright became obsessed with a set of building blocks his mother had given to him on his ninth birthday. He grew up to become the father of organic architecture and the greatest American architect of all time, having designed more than 1,100 buildings during his lifetime. These included private homes - such as the stunning Fallingwater, churches, temples, a hotel, and the world-famous Guggenheim Museum in New York City. When asked how he could create so many designs, he answered, "I can't get them out fast enough." Frank Lloyd Wright was a man ahead of his time who could barely keep up with his own ideas!

A complete biography based on a wide range of previously untapped primary sources, covering Wright's private life, architecture, and role in American society, culture, and politics. Views Wright's buildings as biographical as well as social statements, analyzing his work by type, category, and individual structure. Examines Wright's struggle to develop a new artistic statement, his dramatic personal life, and his political and economic ideas, including those on cities, energy conservation, cooperative home building, and environmental preservation. Includes over 150 illustrations (photographs, floor plans, and drawings--many never before published), extensive footnotes, and the most exhaustive bibliography of Wright's published work available.

Delves into the American architect's family life and achievements and includes photographs of his work.

Insufficient Funds: The Financial Life of Frank Lloyd Wright By Peter C. Alexander Dozens of books have been written about architect Frank Lloyd Wright's architecture, aesthetic, and various design achievements; however, no

one has looked at his business practices until now. In this book, Peter Alexander focuses on the financial life of this American architectural genius after more than fifteen years of research. Wright was a spendthrift who earned a considerable fortune over his lifetime, but he was a man who never had sufficient funds to meet his expenses. Most often, his lack of financial stability was because he had an insatiable need to spend money on Japanese art, pianos, cars, and other assorted luxury items. The material in the book comes from a wide variety of sources, including conversations and anecdotes that have been included in the many published works about Mr. Wright's life and legacy as well as verifiable and apocryphal stories shared by docents conducting house tours. The book is also informed by considerable original material, including archival records about Mr. Wright's financial life and interviews of two of his grandchildren, his Spring Green, Wisconsin neighbors, former apprentices, students enrolled in the Frank Lloyd Wright School of Architecture, and homeowners who worked with Wright to build their dream homes.

An engaging, kid-friendly exploration of America's leading architect and his work This revised and updated edition of a longstanding classic, *Frank Lloyd Wright for Kids*, details the life, times, and work of the celebrated architect. Through simple, kid-friendly prose and anecdotes, author Kathleen Thorne-Thomsen describes the influences of Wright's Wisconsin childhood filled with nature, music, and close family ties; his struggles to find work as a young architect; the unique style that led him to the top of his profession; and masterpieces such as the Robie House, Hollyhock House, Fallingwater, the Guggenheim, and many others. Also discussed are Wright's sometimes controversial private and public life and the people and times that influenced him and vice-versa, with new sidebars on topics such as the Chicago and Bauhaus schools of architecture, Friedrich Froebel and his toy blocks that enchanted Wright as a child, and the 1893 Chicago World's Fair. Budding architects will delve into architectural and design concepts while having fun through 21 hands-on projects, such as creating an edible model of Fallingwater, making a miniature Japanese kite, reading an architectural plan, and much more. A time line, glossary, bibliography, and list of houses to visit are also included.

Wright's family history, personal adventures, and colorful friends are explored in this evocative biography. Secrest had unprecedented access to an extensive archive of Wright's letters, photographs, drawings and books. "Secrest's achievement is to etch Wright's character in sharp relief. . . . (She) presents Wright in his every guise".--Blair Kamin, "Chicago Tribune". 121 photos.

Frank Lloyd Wright (1867-1959) is often described as the greatest of American architects. His works—among them Taliesin North, Taliesin West, Fallingwater, the Johnson Wax buildings, the Guggenheim Museum—earned him a good measure of his fame, but his flamboyant personal life earned him the rest. Here Brendan Gill, a personal friend of Wright and his family, gives us not only the fullest, fairest, and most entertaining account of Wright to date, but also strips away the many masks the architect tirelessly constructed to fascinate his admirers and mislead his detractors. Enriched by hitherto unpublished letters and 300 photographs and drawings, this definitive biography makes Wright, in all his creativity, crankiness, and zest, fairly leap from its pages.
