Construction Equipment Guide covers the nation with its four regional newspapers, offering construction and industry news and information along with new and used construction equipment for sale ...

Both practical and theoretical, this book provides the basic principles of soil chemistry, hydrology, wetland ecology, microbiology, vegetation and wildlife as a sound introduction to this innovative technology to treat toxic wastewaters and sludges. The use of wetlands for acid mine drainage, and metals removal in municipal, urban runoff, and industrial systems is discussed. Case histories are also presented, demonstrating specific types of constructed wetlands and applications to municipal wastewater, home sites, coal and non-coal mining, coal-fired electric power plants, chemical and pulp industry, agriculture, landfill leachate, and urban stormwater. Construction and management guidelines are clearly explained, providing information on applicable policies and regulations, siting and construction, and operations and monitoring of constructed wetlands treatment systems. Recent theoretical and empirical results from operating systems and research facilities, including such new applications as nutrient removal from eutrophic lakes and urban stormwater treatment within highway rights-of-way, are included. This book is an ideal resource for wastewater treatment plants, consulting engineers, federal and state regulators, industrial environmental managers, municipalities, environmental health professionals, and ecologists.

This manual tells and shows how to prepare and rig the D-5B (Type I) tractor-dozers, the John Deere 450G LT full-tracked commercial bulldozer, the Deployable Universal Combat Earthmover (DEUCE), the T-200 Bobcat Compact Track Loader, the 420D backhoe loader, the 410 backhoe loader, the Small Emplacement Excavator (SEE), the 277 multi-terrain loader (MTL), and the All-Purpose Remote Transporter II (ARTS II) which are rigged for low-velocity (LV) airdrop from a C-130 and C-17 aircraft.

Ignited by a single match on April 30, 1977, the Five Mile Tower Fire raged out of control for 17 hours. It would be one of the largest wildland fires in Wisconsin history, ultimately destroying more than 13,000 acres of land and 63 buildings. As a column of black pine smoke reached high in the sky, citizens from Minong, Chicog, Webster, Gordon, Wascott, Hayward, Spooner, Solon Springs, and other communities began showing up to help. The grassy field designated as fire headquarters quickly became a hub of activity, jammed

with trucks, school buses, dozers on trailers, dump trucks, tanker trucks, fuel trucks, and hundreds of people waiting to sign in. More than 900 came in the first four hours, clogging the road with traffic in both directions. Headquarters personnel worked valiantly to coordinate citizens and DNR workers in a buildup of people and equipment unprecedented in the history of Wisconsin firefighting. Based on his own experiences during the long battle, plus dozens of interviews and other eyewitness accounts, Bill Matthias presents an in-depth look at the Five Mile Tower Fire, the brave citizens who helped fight it, and the important changes made to firefighting laws and procedures in its aftermath.

After beginning his career as a photojournalist for a daily newspaper in southern California, Dan Winters moved to New York to begin a celebrated career that has since led to more than one hundred awards, including the Alfred Eisenstaedt Award for Magazine Photography. An immensely respected portrait photographer, Dan is well known for an impeccable use of light, color, and depth in his evocative images. In *Road to Seeing*, Dan shares his journey to becoming a photographer, as well as key moments in his career that have influenced and informed the decisions he has made and the path he has taken. Though this book appeals to the broader photography audience, it speaks primarily to the student of photography—whether enrolled in school or not—and addresses such topics as creating a visual language; the history of photography; the portfolio; street photography; personal projects; his portraiture work; and the need for key characteristics such as perseverance, awareness, curiosity, and reverence. By relaying both personal experiences and a kind of philosophy on photography, *Road to Seeing* tells the reader how one photographer carved a path for himself, and in so doing, helps equip the reader to forge his own.
