Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Relating to both the practice of teaching media studies and also to theoretical questions within media and cultural studies, this study examines pop music, media studies and the micro-cultural politics of adolescence. It argues that media education has neglected pop music, and that, as something of enormous significance in the lives of young people, it merits a serious place in the field.; The author provides accounts of media studies in action, including detailed accounts of classroom discussions, interviews with students and teachers, examples of students' work and their biographical reflections. He links this to broader debates both within cultural studies and around the place of pop music in young people's lives.; "Teen Spirits" should be of interest to students of media and cultural studies, as well as to practicing teachers, and readers with an interest in questions of youth and identity.
