It is based on available literature and expert opinions at the time of development.

Clinical Handbook for Lung Transplantation

• All lung transplant patients require a support person. The under- lying lung disease progresses while waiting for the transplant and they cannot take care of themselves safely. • A support person provides help with day-to-day tasks such as cooking, cleaning, and transportation to hospital appointments.

The patient's lung or lungs are removed and the donor lungs are stitched into place. Drainage tubes are inserted into the chest area to help drain fluid, blood, and air out of the chest. They may remain in place for several days. Transplantation requires a long hospital stay and recovery can last up to six months.
