In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report.

Academic Connections is a four-level integrated skills course designed for students preparing for academic study as well as for standardized tests such as the TOEFL® test. A systematic, step-by-step approach helps students develop and sharpen their language, academic, and test-taking abilities. Academic Connections was developed with the Educational Testing Service (ETS) and is based on extensive research into the actual language demands of higher education. Academic Connections is: Integrated. Academic Connections integrates all four language skills and teaches students how to integrate skills and content in real-world academic contexts. Academic. Explicit, step-by-step academic skill development leads to student mastery. With careful instruction and engaging practice tasks, students learn how to organize information, make connections, and think critically. Authentic. High-interest and intellectually stimulating authentic material familiarizes students with academic content. Authentic tasks include listening to lectures, note-taking, participating in debates, preparing oral and written reports, and writing essays. Assessment-Based. Academic Connections provides a variety of assessments and practice opportunities based upon individual needs. The Audio CD is available separately. Online Component || MyAcademicConnectionsLab MyAcademicConnectionsLab, an integral part of the Academic Connections series, is an easy-to-use online program for students and teachers that saves time and improves results. Students receive personalized instruction and practice. Reading and listening selections and test preparation are all in one place || available anywhere, anytime. Teachers can take advantage of content and class management resources including online assessments, a flexible gradebook, and tools for monitoring student progress.

Agriculture to Zoology: Information Literacy in the Life Sciences sets the stage for purposefully integrating information literacy activities within the subject-specific content of the life sciences. The book is written for librarians and other professionals who teach information literacy skills, especially those in the science disciplines, and most especially the life sciences. It is also intended to be helpful to secondary school teachers, college faculty who teach life science-related subjects, library school students, and others interested in information literacy and science education. Anyone wanting to learn more about the Earth's life sciences, from citizen to scientist, will benefit as well. The book's seven chapters fill a gap with varying perspectives of literacy instruction in the life sciences and include resources identified by academic librarians as important for use in subject-specific research in higher education. Contributors are longtime specialists in the fields of the life sciences, science and information literacy, scientific and electronic communication, assessment, and more, including Arctic and Antarctic information. Specialized focus on information literacy in the life science disciplines, rather than information literacy in general Discussion of library instruction, featuring methods, tools, and assignments to engage students in different areas of the life sciences Chapters on specific life science subjects highlight traditional as well as non-traditional sources

The Handbook of Fiber Chemistry, Third Edition provides complete coverage of scientific and technological principles for all major natural and synthetic fibers. Incorporating new scientific techniques, instruments, characterization, and processing methods, the book features important technological advances from the past decade, particularly in fiber production and novel applications. It contains the latest data and insight into the chemistry and structural properties made possible by these advances. Authored by leading experts in the field of fiber science, most chapters in this third edition of a bestseller are either new or extensively updated. Chapters on synthetic fibers detail their formation from monomers, while those on natural fibers cover extraction and purification methods. Each chapter encompasses definitions, morphology, and fine structure; properties, testing, processing methods, and equipment; and the conversion into marketable products. Taking into account the recent expansion and diversification of markets for various fibers, this book also offers a solid foundation in the principles used for developing new fibers, including biologically and electronically active fibers. The Handbook of Fiber Chemistry, Third Edition offers a better understanding of the structureproperty relationships of fibers and fiber-related phenomena. It is an ideal volume for scientists, technologists, and engineers working to develop novel and innovative products and technologies using natural and synthetic fibers.

Now in one affordable guide, Vault provides an annual up-to-date overview of major MBA career paths.
