Person-Centred Teams: A Practical Guide to Delivering ...

Teams & Leaders We believe that colleagues working in person-centred organisations are more motivated, better communicators, give better support and are better equipped to understand and implement change. Being person-centred with colleagues means seeing and supporting each other as individuals, and working with people's gifts and strengths.

Person-Centred Teams provides much-needed guidance on person-centred working following the roll out of personalisation and personal budgets across health and social care. In order to deliver personalisation you need to work with staff in person-centred ways. Straightforward and easy-to-read, this practical guide describes how to do this by developing a person-centred team using person-centred practices. The authors outline their model for developing a team, and how information is recorded in a person-centred team plan. They explain: Purpose - how to clarify a team's purpose People - what managers need to know about each team member, and how one-page profiles can help Performance - how to clarify service users' expectations of a team's services, and assess whether or not these are being met Process - how person-centred practices can aid teamwork and help your team deliver Progress - how to continuously improve teamwork and performance Each section features clear illustrations and examples from teams to enable you to develop a person-centred team plan and work together in person-centred ways. This guide is essential reading for service providers, managers, practitioners and students in the health and social care fields, as well as person-centred planning coordinators and user-led organisations.

This valuable text offers a range of practical, person centred and evidence based approaches to tackling challenges faced by professionals working with people with learning disabilities.

This practical text helps the reader to analyse issues relating to person centred practice and citizenship. In particular the text considers the implications of this key government initiative for health and social care professionals.

The Individual Service Funds Handbook is the definitive guide to one of the most innovative forms of personal budget in health and social care. It gives a clear explanation of what Individual Service Funds (ISFs) are, how to use them effectively and includes all the information you need in order to implement them in your organisation. The Handbook spans a range of settings, including a dementia care home, supported living and residential homes for adults with learning disabilities and people who use mental health services. It also sets out guidelines and templates which can be used when implementing ISFs, addressing key practical concerns including: how to put together effective support plans, and how to ensure that ISFs are delivered in a person-centred way, how to overcome organisational complexities in implementation and supporting managers. A one-stop resource for anyone wanting to understand the potential of ISFs, the Handbook is required reading for service providers, commissioners, and those engaged in person-centred practice and personalisation, including user-led organisations.

Person-centred practices are a key way to provide the best possible care and support for older people and help them to be active and valued members of the community. Drawing on a wealth of experience of working with older people, the authors present the 6 essential person-centred practices. Each of the practices is designed to support the individual and put what is important to and for the person at the forefront of their care. Each practice has been tailored so that older people can express more easily what does and does not work for them. By actively listening and making each person feel appreciated, the practices represent practical tools for frontline practitioners to form good relationships with people in their care. With supporting stories and full colour photographs to illustrate how person-centred thinking and practice is used in real-life settings, there are many examples to help practitioners to overcome challenges and to really implement positive, effective changes to care. This practical book will be a valuable resource for care staff, social workers and healthcare workers who want to learn about person-centred practices to deliver best practice care and support.

Person-centred care is the idea that the healthcare professional shifts their focus from routine tasks and processes to the individual needs of the patients. It has been highlighted as the cornerstone of high quality care. But whilst few practitioners intend to work in a non-person-centred way, for reasons such as priorities, organisational policies, workplace culture and resources, a person-centred approach can be very difficult to achieve. This book provides a practice-focused exploration of how the ideas of person-centeredness can be developed and incorporated in to everyday practice: - It forms each chapter around an engaging case study, with examples from adult and child health, mental health, learning disabilities and many more. - It introduces the theoretical basis of person-centred care, including the benefits it has for working environments, staff and patients. - It demonstrates how meaningful practice development partnerships can be made with patients, including who to involve and how to involve them. - It takes the reader through the steps of developing a person-centred ethos- from encouraging people to participate in the development, to evaluating the progress and sustaining it in the long run. With clear and accessible guidance through the use of chapter overviews, key points, activities and web-based resources, this is an important book for anyone interested in developing a person-centred approach to care.

This accessible book takes a unique person-centred approach to working with older people and provides an introduction to the legislation, policy, theory and research needed by social workers. The authors explore the experience of being an older person and how practitioners can work to make positive differences to older people's lives. In addition, the book:Goes beyond the mechanistic care management approaches to social work and encourages the reader to see older people holisticallyFeatures case studies and exercises to assist readers in reflecting on their practice Examines a range of contexts and perspectives, including sexuality, spirituality, learning disabilitiesEncourages wider reflection on the constraints posed by organisations employing social workers and the impact on their practiceProvides an up-to-date exploration of safeguarding issuesThe authors take into account financial constraints with regard to the care of older people and the impact of a changing demography, but remain upbeat and positive about the value of social work intervention. Social Work with Older People is relevant for students on placement in adult services or voluntary organizations and social work practitioners working with older people. Contributors: Gill Butler, Rick Fisher, Chris Gaine, David Gaylard, John Gisby, Vivienne Killner, Andrea Linell, Andy Mantell, Debbie Smallbones, Chris Smethurst, Sally Stapleton, Graham Tooth, Christine Wright

Delivering effective and responsive person-centred care is a key requirement of nurses' professional practice and a core skill nurses must develop throughout their degree. This book explains and demonstrates how nurses can transform the ideals of person-centred care into reality for patients throughout their healthcare journey, in a variety of settings. Through the use of varied case studies, this book applies this practice to all fields of nursing, allowing students on any course, at any point in their degree to find useful guidance within its pages. importance of person-centred practice (PCP) from a variety of practice, strategic, and policy angles, exploring how the principles of PCP underpin a variety of perspectives, including within leadership and in the curriculum. The book explores not only a range of methodologies, but also covers a variety of different healthcare settings and contexts, including working within mental health services, acute care, nursing homes, the community, and working with children and people with disabilities. Key features: Significantly updated and expanded since the previous edition, taking into account the considerable changes in recent health care advancements, including the 'Francis' report Builds on previous perspectives of person-centredness in nursing and applies them in a broader nursing and health care context Includes a stronger exploration on the role of the service-user Shows the use of life-story and narrative approaches as a way of putting the individual's identity at the heart of the care relationship Includes learning features such as links to current practice developments and reflective questions

A guide for charities and private sector organisations in health and social care on how to become a person-centred organisation, which provides strategies and tools rooted in experience.
