Human beings, regardless of age, sex, or state of health, are designed by evolution to form meaningful interpersonal relationships through verbal and nonverbal communication. The theme that empathic human connections are beneficial to the body and mind underlies all 12 chapters of this book, in which empathy is viewed from a multidisciplinary perspective that includes evolutionary biology; neuropsychology; clinical, social, developmental, and educational psychology; and health care delivery and education.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Undergraduate course in Entrepreneurship and New Venture creation. Entrepreneurship 2/e takes students on the entire journey of launching a new venture, with a unique emphasis on the front end of the entrepreneurial process.

In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

A technology expert describes a possible future, and its repercussions in the area of privacy, social control and political manipulation, of a world where more and more things, like eyeglasses, thermostats and home security systems are reliant on the Internet.

Bringing together a range of core texts into one volume, thisacclaimed anthology offers the definitive resource in culture,media, and communication. A fully revised new edition of the bestselling anthology inthis dynamic and multidisciplinary field New contributions include essays from Althusser through toHenry Jenkins, and a completely new section on Globalization andSocial Movements Retains important emphasis on the giant thinkers and“makers” of the field: Gramsci on hegemony; Althusseron ideology; Horkheimer and Adorno on the culture industry; RaymondWilliams on Marxist cultural theory; Habermas on the public sphere;McLuhan on media; Chomsky on propaganda; hooks and Mulvey on thesubjects of visual pleasure and oppositional gazes Features a substantial critical introduction, short sectionintroductions and full bibliographic citations

In a state of ontological crisis, all boundaries have been ruptured between nature and culture, human and machine, and object and subject. We find ourselves exhaustively tackling the turmoil of our own designed circumstances, as we emerge to become extensions of the extensions that we built. In this practice-based design theory project, the authors share their experiments in negotiating power with things, hacking mundane objects, and thus their own everyday lives, allowing themselves to be swayed and misled, disrupted and called into question. The experiments delineate a mode of critical cultural inquiry where design and sociology collide to elicit critical perspectives on the 'designer' and the 'designed' as we act within an entangled politics of things.

This book provides a comprehensive overview of the process of building healthy early social and emotional relationships with infants from a developmental perspective. The book synthesizes current research on the contextual influences of attachment, family relationships, and caregiving practices on social-emotional development. Chapters examine the processes of socioemotional development—particularly in relationships with parents, other family members, and peers—and identify areas for promoting healthy attachments and resilience, improving caregiving skills, and intervening in traumatic and stressful situations. Chapters also present empirically-supported intervention and prevention programs focused on building early relationships from birth through three years of age. The book concludes with future directions for supporting infant mental health and its vital importance as a component of research, clinical and educational practice, and child and family policy. Topics featured in this book include: The effect of prenatal and neonatal attachment on social and emotional development. The impact of primary relationships and early experiences in toddlerhood. Toddler autonomy and peer awareness in the context of families and child care. Supporting early social and emotional relationships through The Legacy for Children™ Intervention. How to build early relationship programming across various cultures. Building Early Social and Emotional Relationships with Infants and Toddlers is a must-have reference for researchers, clinicians and professionals, and graduate students in the fields of infant mental health, developmental psychology, pediatrics, public health, family studies, and early childhood education.
