The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards. Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The objectives of the "Interagency Helicopter Operations Guide" (IHOG) are to: Promote safe, cost-efficient and effective aviation services in support of agency and interagency goals and objectives; Define and standardize national, interagency helicopter management and operational procedures for

helicopter users from participating agencies; Through standardization, facilitate the ability of personnel from different agencies to work cooperatively on incidents or projects; and Provide a framework within which areas, regions, states, and local units can provide supplemental, site-specific guidance. The procedures contained in this guide apply to helicopter operations conducted by providers and users of helicopters from participating agencies. This guide addresses both incident and resource helicopter operations.

In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals: • How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world • Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre • That practice, rather than talent, is the driving force behind musical expertise • How those insidious little jingles (called earworms) get stuck in our head A Los Angeles Times Book Award finalist, *This Is Your Brain on Music* will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

In this second edition essential guide some 150 key genres, movements, theories and production terms are explained and analysed with depth and clarity.

It's the inside scoop on US military special operations. From weapons, gear, missions, and commandos, learn every military secret from the eighteenth century to today. Few aspects of the US military pique people's interest more than special ops. Due to the clandestine nature of their missions, weapons, and gear, these elite fighting forces are cloaked in an aura of intrigue that has only ratcheted upward with the expanded roles they have assumed in today's world, not to mention their recent and frequent appearances in film, books, and other mass media. In *US Special Ops*, longtime military author and special-ops expert Fred Pushies takes on the entire scope of America's elite fighting forces, beginning with their earliest days. Pushies profiles hundreds of weapons, gear, vehicles, missions, and commandos, from eighteenth-century fighters like Francis Marion right up through the most advanced capabilities of today's Green Berets, Rangers, SEALs, Marine Force Recon, US Air Force combat controllers, CIA Special Activities Division, and more - well over 350 entries in all. From the tomahawks used by Rogers's Rangers to special-ops legends like Col. Aaron Bank to Operation Neptune Spear and beyond, *US Special Ops* is a

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden).
